

MY PROFESSION

Motivated and self-driven software engineer with a strong foundation in web development, excellent problem-solving skills, and a passion for tackling challenging projects. Committed to meeting deadlines and eager to contribute as an entry-level full-stack developer or intern.

EDUCATION

ALX Software Engineer Program 2022– 2023

- Completed an intensive software engineering program focused on full-stack development. - Gained hands-on experience with modern web technologies and best practices. - Collaborated on real-world projects to enhance coding and problem-solving skills.

Udemy Web Development Course

- Successfully completed an online web development course covering front-end and back-end technologies. - Acquired practical knowledge of HTML, CSS, JavaScript, and popular frameworks like React and Node.js. - Developed multiple web applications as part of the course curriculum.

Self-Learning

- Continuously expanding skills and knowledge through online resources, tutorials, and personal projects. - Actively contribute to open-source projects on GitHub (github.com/Oluwasegun02) to showcase coding abilities.

Languages: - Fluent in English

SKILLS

- Front-End: HTML, CSS, JavaScript, React.js, Redux, Bootstrap
- Back-End: Node.js, Express.js, MongoDB, SQL, RESTful APIs, Django, Flask
- Version Control: Git, GitHub
- Tools: Visual Studio Code, Postman, Heroku - Basic Knowledge: Python, C
- Soft Skills: Communication, Time Management, Problem Solving, Teamwork

CERTIFICATIONS

- Software Engineer Certification Program
- Front End Web Development Certificate
- 100 days of coding python Certificate Program

PROJECTS

1) E-commerce Website

- Developed a fully functional e-commerce website using Html with [jinja syntax](#) and Bootstrap for the front-end and Python with Django for the back-end.

- Implemented user authentication, product catalog, and shopping cart functionality. - Utilized SQL to store product data and user profiles.

2) Task Management App

- Created a task management application using React and Redux for state management.

- Designed an intuitive user interface with features for adding, editing, and completing tasks.

- Integrated local storage to persist task data across sessions.

3) Social media Platform

= Built a social media platform with a Node.js back-end, Express.js for routing, and MongoDB for data storage and hbs css for the front-end

- Implemented user registration, login, and the ability to create, edit, and delete posts.

- Secured the application with user authentication and authorization.

AirBnB Clone

= Built a AirBnB Clone with a Python back-end, Flask for modeling, and SQL for data storage it a console app with limited command on command line interface

- Implemented user registration, login, and the ability to Create, Read, Update and delete

- Secured the application with user authentication and authorization.

- TEAM Work which I collaborate in ALX
